

Applied Research Consultancy

Business-Community Synergies (BCS) is seeking two consultants to participate in an applied research project. The consultant will:

- Conduct background research and analysis on companies, industries and other areas relevant to local context analysis.
- Participate in project field work with team and contribute to ongoing qualitative data analysis.
- Conduct and integrate qualitative and quantitative data and help generate recommendations for action.
- Assist in drafting and finalizing project report.

Qualifications:

- Education: Master's degree or higher.
- Familiarity with oil, gas or mining industries and their corporate social responsibility.
- Strong interest in BCS's work and in an engagement-based approach to development.
- Exceptional writing skills.
- Strong communication skills (oral and written).
- Independent and able to take initiative without direct supervision. Professionalism, enterprising, ability to work collaboratively with colleagues.
- Experience in qualitative and quantitative analysis.
- Experience using participatory training or participatory appraisal techniques.

Salary/Rates based on experience.

To apply, please send your CV and Cover Letter to Info@BCSynergies.com.
